update april

Europe's largest supplier of diving accessories

Dive Technics, since 1978 active as wholesaler in Europe - Belgium.

We offer the largest collection of diving and water sport accessories available in Europe. Our product range contains more than 4000 products such as: ATEX work lights, dive lights, dive knives, dry cases, thermal undersuits, underwater photography, dive cylinders, oxygen kits, lead weights, special glues and many more.

On top of our broad product portfolio, we offer custom made services such as logo printing, personalized labeling and packaging of our OEM products.

With this large variety of products our focus is aimed on the resale market (watersport and dive stores, pool & spa shops) and the professional market (professional diving and training, fire fighting and training, industry).

We are a dynamic and growing company located in Broechem - Belgium. Because of our excellent logistic location are able to ship fast and smoothly throughout whole Europe. The offices and warehouse (1500m²) are all in a restored historical building which functioned as a mechanical millhouse. With our enthusiastic team we are proud of our personal and professional approach. And we are ready to satisfy our customers' needs.

Daily shipping over 26 European countries.

D6 - 1200 lumen -

D6, a compact and sturdy scuba diving flashlight with 1* Cree XPL2-V6 light chip produces brightness up to 1200 lumens. Powered by 1*18650 2600mAh battery which can be charged directly through the charging port in the tail cap. Specially made of Grade III anodized aircraft-grade aluminium alloy to make it more resistant to seawater.

1200 lumens	600 lumens	SOS 1200 lm	11°	USB-C charging	Φ 32.5 156 mm
120 min	180 min	5 hrs			
IPX8 100m	€99 ⁹⁵				

D6 PRO - 2000 lumen -

D6-PRO, A powerhouse of light for its small size! Use it indoor or outdoor, it's there to illuminate your activities. Same convenient use as the D6, rugged and durable. A beam of 8.6° to illuminate longer distances. Onboard USB-C port for charging. Visual battery level indicator with four levels are displayed on the push button.

2000 lumens	1000 lumens	SOS 2000 lm	8.6°	USB-C charging	Φ 38.8 166 mm
120 min	180 min	4 hrs			
IPX8 100m	€149 ⁹⁹				

D6 MAX - 5200 lumen -

D6-MAX Just 5200 lumens onboard to get the job done. That's what the D6 max delivers in turbo mode. It's all-round with a long runtime, rugged and durable. Onboard USB-C port for charging. Visual battery level indicator with three levels are displayed on the push button.

5200 lumens	3500 lumens	600 lumens	8.6°	USB-C charging	Φ 59.5 255 mm
4 hrs	5 hrs	7 hrs			
IPX8 100m	€269 ⁹⁵				

D6S - 1400 lumen focusable beam-

Adjusting the beam couldn't be easier: simply rotate the lamp head! Adaptable to all situations, can be used for a variety of indoor and outdoor activities. The 73° wide angle is also ideal for photo/video applications. Can be attached to a video arm with the supplied bracket. Integrated USB-C port for charging. Visual battery level indicator with four levels are displayed on the push button.

SPELEO

sidemount

The Speleo is a sidemount system dedicated for cave divers and explorers at the end of the cave line. Whether in open water or in narrow spaces of wrecks and caves - the Speleo is your reliable partner with innovative details.

Three bladder sizes, two choices of valves positions, two harness options and two weight system settings mean 24 possible configurations. Every diver can find a perfect configuration for sidemount diving.

With the "out-of-the-box" system it's possible to dive with Speleo almost immediately after purchase.

TESTED	in Europe, Mexico and New Zealand

FLY SIDE

sidemount

Having tried various sidemount systems and not being completely comfortable, got us thinking of what divers need in different environments. We have developed a modular, but still easy to use system.

We wanted a system which will let the user arrange enough weight to submerge and dive comfortably from start to finish. The solution is very simple – a backplate for perfect distribution of weight along the divers back.

#FSM1242B FLY SIDE SET complete SS3mm backplate **€960**

The first lamp in the world that cannot be flooded. Using a special dual software, BANG is operated by tapping on the side of the torch body.

BANG SPOT

Designed for the more advanced diver who wants a narrow beam for signalling, dives in low visibility water and needs to glimpse the sediment.

366 lumens	4300 lux/1 m	1100 lumens	14000 lux/1 m
10 hrs		2 hrs	
5°		250 g 70 g	7000 K

BANG WIDE

Designed for the recreational and sport divers who dive in clean water and want intense light cover of the largest possible area

366 lumens	2150 lux/1 m	1100 lumens	7000 lux/1 m
10 hrs		2 hrs	
10°		250 g 70 g	7000 K

SPECIFICATIONS

- 2 power settings - 30% (366 lumen) and 100% (1100 lumen)
- Running time 2 hours / 10 hours
- Charging through the magnetic charge contacts at the rear of the torch
- Unique way of operating - light tapping onto the BANG space, 3 times to ON/OFF, 2 times to switch between the power modes
- Dual software through an accelerometer analyses & identifies whether the lamp is in or out of the water
- Outside of the water the software analyses vibrations to minimise the possibility of accidental activation of the light through transportation etc.
- 7000k light temperature
- Overheat protection and short circuit protection
- Overcharge & discharge protection
- Universal soft handle
- Packed in a "wash bag" style case
- Weight: 250g out of the water, and only 70g underwater
- Battery life: 600 full charge cycles

ROBUST AND FOR SERIOUS BUSINESS

FINN LIGHT 2500

With the beam angle 5° high luminous intensity in the spot and wide bounded halo, this is the best choice for divers demanding the optimized light beam. Bright spot illuminates the object while halo gives the light for surroundings, it shines through the murky water and it is convenient for effective signalization. Wide bounded halo lets you know where you are. It illuminates the space in front of you without blinding your dive buddy. FL 2500 diving light is available in 3 versions - SHORT (cordfree), LONG (alu canister) and XLONG (delrin canister).

*Long

PROVIEW MASK

FINNSUB PROVIEW is a frameless mask with low volume and great viewing angle, packed in a handy softshell box.

The wide field of vision doesn't limit perception of the surroundings during a dive, provides perfect control of your dive buddy and dive equipment. Proview diving mask has a modern shape, very soft 100% silicon which perfectly sticks to the face. We have proven that it fits to almost everyone. The shape of the nose is optimized for comfort and at the same time for easy pressure equalization, even in thick gloves. This frameless mask is great to be used as the main mask but also as the backup mask due to its compact size when packed.

Available in the unique colour DARK GREY with matt surface and other fashionable colours:

- FSA00171 PROVIEW Grey mask
- FSA00172 PROVIEW Blue mask
- FSA00173 PROVIEW Yellow mask
- FSA00174 PROVIEW Salmon pink mask
- FSA00175 PROVIEW Purple mask
- FSA00176 PROVIEW White mask
- FSA00177 PROVIEW Aqua
- FSA00178 PROVIEW Steel blue mask

€45

VIEW MASK

FINNSUB VIEW is a great frameless mask to be used as a backup mask but its great features make it the perfect main diving mask too.

Rough design, stark shape and black matt colour is appreciated by real technical divers. Soft smooth silicon is very comfortable and sticks nicely to the face. View mask fits perfectly to a hood face seal as well as a drysuit pocket.

Many divers have loose diving mask boxes at home therefore this mask is offered for better price without a box. Softshell mask box can be ordered separately as an accessory.

FIORD LS

The Fiord Long Sleeve Top is a garment designed with the utmost versatility in mind. Through its development, input was gathered from experts across a range of sports including Open Ocean Paddlers, White Water Rafterers and SUP Surfers to name just a few. The Fiord LS's versatility comes from the precision arrangement of 385gsm Fernotherm3 and 240gsm Activflex material panels.

TECHNICAL FEATURES

Water Repellent Outer Treatment

Windproof Breathable PU Membrane

Soft-touch moisture wicking Fleece

4-Way Stretch Panels

Soft Touch brushed internal lining

High-Stretch Neoprene Neck

UV 50+ sun protection

DESIGN FEATURES

YKK AquaGuard® water repellent zipper

Integrated Utility Pocket with Headphone port

Quick Adjust Waist System

Board short connection loop

Hi-vis reflective print

Angled Comfort Neck Seal

Re-usable Dry Bag Packaging

TUNDRA LS

The Tundra in its development has been taken through its paces by test pilots across a range of sports; resulting in the best piece of multi-sport gear perfect for applications such as Kayak clothing, SUP clothing, Kite Surfing tops and Dive Wetsuits. The Tundra’s performance comes from its material and design. The anti-wind chill of the 385gsm Fernotherm3, makes it perfect for above water paddle sports and soft touch internal lining beats all competitors when worn below the water in sports such as Scuba Diving and Snorkelling. Form cut performance design and the unique ‘silver back” aesthetics encapsulate the high tech performance capabilities of this unique top.

TECHNICAL FEATURES

BOMBORA LS

Carefully designed with high-intensity watersports in mind the Bombora LS is a Long Sleeve top that utilizes the unique 240gsm Activflex material. The design focus ensures the garment conforms to the body, whilst still maintaining an unrestricted range of movement. The breathable nature of the Activflex avoids overheating, whilst the brushed internal lining provides superior softness and anti-chaffing characteristics against the skin. Low profile flat-lock joining of the ergonomically designed active panels keeps the garment firmly in place through all levels of intense activity.

EMINENCE QD

The Eminence is the next evolution of wetsuit design built specifically to the needs of the modern scuba diver in either 7mm or 5mm. An elite combination of high-stretch neoprene[M1], proprietary materials and simple effective features, make the Eminence stand out from the crowd. Quick-Dry thermal panels throughout the inside of the suit adds valuable thermal properties equivalent to that of another millimetre in neoprene without the added buoyancy. This also eliminates the uncomfortable task of donning a cold wet wetsuit in repetitive dive situations. Clean lines and form fit inspired from the surfing industry make the Eminence one of the most comfortable, thermally effective suits available in today's market.

TECHNICAL FEATURES

Available as 7 or 5 mm wetsuit

Quick Dry thermal lining technology

High stretch neoprene

High warmth to weight ratio

3D print on shoulders against BCD abrasion

QD BOOTS

Fully lined with a custom 200gsm Quick Dry fleece lining, the QD Enth Degree boots are designed for warmth and comfort and will ensure you are putting on a ‘dry’ boot every time. Made from high stretch neoprene, they are incredibly easy to slip on and off, and so comfortable and flexible there’s no need for an annoying, uncomfortable, leaky zipper. The angled ankle sits at a position that is natural to any active water sports enthusiast. Featuring an innovative cone seal around the top to prevent water ingress, the QD boot also comes with a free pair of Enth Degree branded boot liners.

TECHNICAL FEATURES

- Custom 200gsm Q-Dry lining technology
- Angled ankle design for flexibility and comfort
- Parabolic cone cuff zipless entry design
- Smooth Skin seal at cone cuff entry
- Non-Slip semi rigid sole
- Fin stopper on heel

QD HOOD

Enth Degrees 5mm Neoprene QD hood combines warmth, flexibility and incredible quick-dry functionality like no other. The thermal properties of Enth Degrees proprietary Q-Dry lining offer thermal gains equivalent to that of another millimetre of neoprene, without the bulk and increased buoyancy. Stylish two-tone high flex lining exterior, with glide skin face and neck seal, ensures your hood keeps your bodys most critical heat loss zone warm at all times.

TECHNICAL FEATURES

- Custom 200gsm Q-Dry lining technology
- Dual glued and blind stitched seams
- Air trap dual vent system, eliminating hood lift
- Smooth skin face and neck seals
- Reflective print for added safety
- Two-tone high-stretch outer lining

QD GLOVES

The ultimate combination of warmth, flexibility and comfort. Featuring the same super high stretch neoprene and custom 200gsm Quick Dry lining found in the Kenetic and Altum wetsuit series, the QD Glove provides advanced thermal properties for any situation. The high stretch 2mm neoprene provides the flexibility your hands need to perform the finer adjustments that are demanded in high level watersports.

TECHNICAL FEATURES

Glue coated lining in palms

2mm high-stretch neoprene

Custom 200gsm Q-Dry lining on palms and back of hand

Neoprene wrist seal keeps water ingress to a minimum

High-vis reflective print

F3 HOOD

The F3 Hood makes use of Fernotherm 3 technology using soft-touch fleece which offers superior comfort against the skin, moisture wicking characteristic and thermal heat retention properties. These factors combine to keep your head warm whether you're wet or dry. The F3 Hood works as a stand alone hood, yet is also designed to be layered underneath another neoprene hood for an unbeatable level of protection.

TECHNICAL FEATURES

- Designed to counteract heat loss from the head
- Super Comfortable 4-way Stretch
- Fernotherm3 tri-laminate with lycra binding finish
- Water Repellent treatment for fast water run-off
- Neoprene face seal and flatlock seam construction
- SPF 50+

F3 SOCKS

Once you've experienced the performance of the F3 Socks with grey neoprene ankle seals you'll be hooked. Constructed from Fernotherm3 for superior warmth characteristics these socks will keep your feet snug and lock in warmth.

TECHNICAL FEATURES

- For use as stand alone or underneath any Aquatic Shoe
- Keeps feet warm in both above and below water situations
- Super Comfortable 4-way Stretch for ease of donning
- Neoprene ankle seal keeps water ingress to a minimum
- Fernotherm3 tri-laminate construction
- SPF 50+

TABLET

SEAC Tablet, Dive Computer with Built-in Bluetooth, Handles up to 3 Blends Gas Mixes, With A Large Display, Wireless Connection with up to 3 Transmitters

- SEAC Tablet is the multi-blend Gas Mixe dive computer with integrated Bluetooth connection, perfect for accompanying divers who dive Nitrox or are perfecting their knowledge with specific courses

- Maximum visibility in all conditions: the LCD display is large and easy to read, with the use of icons, segments and matrix for maximum graphic flexibility Visibility. The LCD screen with its contrast and backlighting featurers is fully adjustable in intensity

- Easy to use even with heavy Thick neopren or Dry gloves thanks to 2 well-spaced and easily operated buttons

- Main functions: Scuba mode with Bühlmann ZHL-16C algorithm for improved dive planning. Freediving mode with Dive/Surface time and current and maximum depth, depth gauge and stopwatch for autonomous management of dive profiles with Gauge Mode. Off mode for using the stopwatch in static apnea

- Integrated gas supply management thanks to probes Transmitter : the interface supports up to 3 probes, Transmitters to that connect a maximum of 3 cylinders with dedicated Gas mixtures to the computer

- Logbook records up to 65 hours of diving in Scuba/Gauge mode, 24 in Freediving mode. Data can be downloaded via Bluetooth and cable (optional)

- Double silicone strap and bungee strap included. Long-life battery records approximately 600 dives over 2 years and is easily replaceable. By the user

#160-60NS Computer tablet black/silver

€389

BCD TYPE

SEAC Type, Jacket in traditional Mono Bag for Scuba Diving, GAV with excellent fit, Ultralight

- A COMFORTABLE AND FUNCTIONAL BCD: Made of a traditional single-bag made of 420D Nylon with a built-in backrest, the SEAC Type is an extremely practical jacket. The straps that adjust the shoulder straps depart directly from the bag to avoid deformation and ensure greater comfort.

- MORE FREEDOM OF MOVEMENT: the fit of this jacket has been redesigned to make it more snug and hydrodynamic, ensuring the necessary freedom of movement. The front rotating buckles on the shoulder straps prevent compression and rubbing of the straps in the bust area, to better fit the female body.

- SUITABLE FOR ALL PHYSIQUES. The mono-bag 'slips' over the harness independently. When inflated, the pocket area remains on the hips without compressing the abdominal area, making the SEAC Type jacket perfect for every diver.

- THE BEST THAT YOU CAN HAVE FOR YOUR DIVING: this CE certified BCD ensures maximum lightness and reliability, thanks to the perforations of Nylon 420 ND, and is perfect to take on the road.

- EQUIPMENT SUPPLIED: harness with single bag, 2 large side pockets with gusset and integrated ballast system (max 4 Kg each) with comfortable handles for a secure grip, 2 further integrated weight pockets at the back (max 2 Kg each) and 5 stainless steel D-rings.

SMART

The Seac Smart BCD is a traditional jacket characterized by a reinforced bladder and a quick release weight system. Seac Smart is a robust, compact and easy to use BCD, great for beginner divers and those who love to travel. On both sides there are separate pockets for weights and accessories. The lead pockets have two openings with Velcro, one, upper, to insert lead and another, lower, to ensure the quick release of the weight in case of necessity. The lead release system is a Safety Release type with a silver buckle and handle for high visibility. The accessory pockets close with robust anti-corrosion zippers.

Stickon-Optics

1. Wash your hands, dive mask, and the lenses with oil free liquid soap and warm water to remove any dust and oils.

2. With clear warm water in the inside wells of your dive mask, press one lens onto the bottom 25% of each lens. The lens centers should be approximately 2.5 inches apart.

3. To check for proper placement, put on your dive mask and look through the lenses. Placement adjustments are easily made by sliding your DiveOptx lenses while they are still wet.

4. When done, pat dry with a lint-free towel. Let your lenses dry completely before using. Stickon lenses are removable, leave no residue, and can be reinstalled by repeating these instructions

HANGAIR HANGER

Power dry your gear with the HangAir, a system that dries in hours, not days.

Using a built in high power fan, the HangAir dries your suit faster, slows the development of bad odors, and prolongs the life of your gear. Its strong structure and stainless steel hook can support up to 45kg!

Ideal for scuba wet and dry suits, fire and electrical protective wear, leather cycling gear, etc.

- high power water proof fan
- 3.39 m³ airflow/min
- 110/240 VAC universal power adapter
- 4.5 meter power cord
- 54.61 x 17.78 x 36 cm
